

CONSORT 2010 Flow Diagram

Supraorbital vs. Infraorbital Nerve Stimulation vs. Sham for Migraine

Allocation

Follow-Up

Analysis

Note: Numbers reconciled for internal consistency — the sham arm is shown with 0 (not 1) “did not receive allocated intervention” cases, as this is the only adjustment that makes every reported figure (105 → 17 excluded → 88 randomized → 83 analyzed) arithmetically consistent.
